

Homework 12 Warmup

Atul Balaji (ab5246)

Feedback

- Positive - The tree of pasta structure has been implemented well and the idea of minimap is a good addition to the learning component.
- Need to work on - Create arrows for navigation in the tree, recipe page template should be made, make the minimap expandable to zoom and view the tree. Navigation using the minimap would also be useful. A basket to keep track of ingredients would be good. Fix bugs in the quiz component such as multiple selections, redirect to the correct recipe page after a quiz question.

Job Assignments

Tree - Benjamin

- Create arrows and intuitive navigation
- Add hover functionality to nodes as buttons
- Make nodes prettier (text and images)
- Recipe page - create template

Minimap - Kiran

- Expandable minimap through click for zoomed in view
- Jump click navigation via expanded minimap

Basket - Benjamin / Kiran

- Amazon style basket, increment items, dropdown visual, add and remove items as part of the tree traversal

Quiz - Atul

- Create 3 ingredient question template
- Make a button to view the correct answer if an incorrect option was selected
- If an incorrect option was selected, make a button to view ingredients
- If the correct answer was selected, make a button to redirect to recipe (Ben can help)
- Make it such that it is not possible to go back via browser in the quiz (Kiran can help)
- Fix the multiple button and multiple answer bugs

Quiz - Silvia

- Create the fill in the blanks question template with required features

Integration - all members
